- **Soft skills:** Communication, Collaboration, Empathy, Excellent written and spoken English, Teamwork, Responsibility.

---

## WORK EXPERIENCE

### Software Engineer

September 2022 - Present

- My focus revolves around creating efficient, responsive solutions and maintaining legacy systems, with key performance indicators like page load times (decreased by 20%), responsiveness (100% responsiveness on all projects), user support response time, and system security as crucial measures of success.
- Collaboration with a team of designers, product managers, and engineers, overseeing development and continuous enhancement of systems per user and business needs.
- Enforcement of security measures on the frontend, addressing vulnerabilities, protecting data, and upholding security standards.
- Addressing user-reported issues promptly, maintaining optimal application performance and enhancing overall user satisfaction. My team's effort has achieved a 90% satisfaction rate from users regarding issue resolution and support services.

### Frontend Developer, Intern

July 2022 - September 2022

- I partnered with experienced frontend developers to build, debug, and enhance the user interface of web applications.
- I implemented Figma designs into responsive web applications.
